DOOLEY'S NATURAL GAS II

Natural Gas Meter Safety

Snow or ice on or near your natural gas meter can cause potentially dangerous conditions. If blocked, pressure may build up, creating dangerous situations or appliance failure.

- Do not deposit snow piles on or near the meter.
- Do not use a snow blower, shovel, or sharp object to remove ice.
- Do not tamper with the meter or attempt to service/maintain the meter yourself.
- Use a broom or your hand to remove snow around and on the meter and piping. Make sure all vents are clear.
